To: Mr S Castillo, Tyre Protector Las Americas

Dear Mr Castillo,

It is my pleasure to write to tell you that your product, Tyre Protector has given us excellent results.

Before Tyre Protector, we were suffering from high operational costs due to punctures, but since we started using Tyre Protector, punctures have reduced by 100%.

We applied Tyre Protector in a Caterpillar Bobcat 226B which we rented to PH Esplendor in Via España. Working conditions are extreme, as they are on all construction sites. The major problem was punctures where they were experiencing 2 to 3 per week.

From the moment we applied Tyre Protector, the punctures stopped.

A significant saving has been achieved for Cardoze & Lindo who is very a very satisfied Customer. By installing Tyre Protector , we have reduced punctures and downtime by 100%.

We applied the product on 9th September 2009, when the machine had 452 work hours and on 22nd December 2009 the Bobcat, still working on the same project, had accumulated 713 work hours – 260 hours without punctures.

Cardoze & Lindo can recommend Tyre Protector Heavy Duty in Rental equipment as it obtains highly satisfactory results.
