

## **Tyre Protector Dramatically reduces costs at Pemex Oil Refinery in Mexico**

Backhoe Loaders operating in difficult conditions at the PEMEX plant in Nuevo Leon, Mexico, were experiencing 15 to 20 punctures a week with the result that for up to 75% of time, the vehicles

were standing idle.

After installing Tyre Protector Heavy Duty, the plant calculated that they saved \$1200.00 every month on the costs of replacement tires and repairs and decreased downtime of the Excavator by over 85%.

Permanent Puncture Protection
