

Extend the life of your Tires Panama

Tyre Protector is a mono propylene glycol gel providing highly effective puncture protection for all types of construction vehicle tires. Available in two formulas, Heavy Duty and High Speed, Tyre Protector is non-hazardous. In fact, its eco friendly, provides permanent puncture protection and helps extend the life of the tires.

This innovative product reduces vehicle downtime, even after a puncture; helps to maintain the correct air pressure within the tire and ensures maximum fuel economy, saving you money for every kilometer that you drive. It also improves safety

conditions, because it seals a puncture immediately.

For these reasons, Tyre Protector has received excellent accolades around the world and is especially beneficial for tires on vehicles for mining, construction, agriculture, tractors, harvesters and industrial, cargo trucks, trailers, passenger and 4x4, armored vehicles, quad bikes and ATVs.

Tyre Protector, located in Panama City, Panama is the head office responsible for marketing and distribution throughout Central, South America and the Caribbean. Website:
